

Profile

Junior Data Analyst with strong skills in SQL, Python, data cleaning, dashboard development, and reporting. Experienced in supporting cross-functional teams with actionable insights and building scalable analytics workflows. MSc Data Science graduate with exposure to Azure, Databricks environments, and SaaS product analytics. Clear communicator, fast learner, and collaborative problem solver.

Skills

Languages: SQL, Python, Java (basic), JavaScript (basic)

Data Engineering & Modelling: ETL/ELT, data validation, schema modelling, feature processing

Analytics: Data cleaning, exploratory analysis, KPI tracking, reporting

Dashboards: Power BI, Tableau, Looker (concepts)

Cloud & Platforms: Azure (familiar), Databricks (exposure), AWS S3/IAM basics

Tools: Jupyter, VS Code, Git/GitLab, Excel (Power Query, PivotTables)

Soft Skills: Cross-team collaboration, requirement gathering, documentation, communication

Experience

Junior AI/Data Engineer Intern, Innovorex

Jul – Sep 2025

- Processed, cleaned, and validated structured datasets to support learning analytics.
- Built Python data workflows for ingestion, transformation, and reporting.
- Collaborated with product and engineering teams to refine platform insights.
- Documented pipelines, edge cases, and data assumptions for internal teams.

Data & Content Analyst Intern, Crewbytes

Jan – Jun 2024

- Cleaned and structured large datasets, improving consistency and usability.
- Performed quality checks and documented anomalies to support product teams.
- Assisted in building content-based analytics summaries for internal reporting.

Data Analyst Intern, SkillBanc

May – Jul 2022

- Performed SQL-based filtering, cleaning, and analysis to support business reporting.
- Delivered Excel dashboards summarizing metrics used by management.

Projects

SaaS Analytics: Zero-Shot Scene Classification Platform (MSc Dissertation) *Python, Pandas, scikit-learn, Databricks-style workflows*

- Designed robust pipelines for data cleaning, feature extraction, and reporting.
- Debugged inconsistencies and implemented validation rules to ensure data integrity.
- Produced dashboards summarizing model performance and data insights.

Energy Demand Forecasting — Analytical Pipeline *Python, SQL, Power BI*

- Built end-to-end workflow including ETL, exploratory analysis, and KPI visualization.
- Created clean Power BI dashboards for interpreting daily usage patterns.

Predictive Maintenance Dashboard *Python, XGBoost, Power BI*

- Cleaned sensor data, engineered features, and generated risk-based reports.
- Collaborated with stakeholders to shape dashboard metrics and usability needs.

Education

Technological University Dublin, Ireland

2024 – 2025

MSc Data Science (*First Class Honours*)

ICFAI Tech University, India

2020 – 2024

B.Tech Artificial Intelligence and Machine Learning (CGPA 8.3/10)

Certifications

AWS Cloud Practitioner Essentials	2025
Generative AI & LLM Development	2024
